Program

Joyce Keeny introduced our speaker, **John Edwards**, former soldier and nurse for Ontario County Public Health.

John explained that it is always good to be prepared, because you never know what is going to happen. Everything from natural disasters to health emergencies could happen at any time,

and it is always good to have a plan before that happens. John suggests that you always have supplies to last you for 36 to 72 hours and enough water for each person to have 1 gallon per day. He also recommends that you have about 5 days of your prescription medications in case of emergencies.

Always have an emergency kit in your car with water, flashlight, blanket, snacks and a charger for your cell phone. John explained that when cell towers go down, that most of the time you will still have the ability to text.

All this information and more can be found at <https://emergency.cdc.gov/preparedness/kit/disasters/>.
