Program

Today we were given a presentation about Harmful Algae Blooms (HABs) by **Bill McAdoo**. Bill represents the **Seneca Lake Pure Waters Association** and gave us an idea of what to look out for when it comes to HABs. The Department of Environmental Conservation has an excellent source of HAB information [here](#).

Bill also explained the process of looking for HABs. Volunteers with the Seneca Lake Pure Waters Association inspect, sample and report on over 75 miles of shoreline. These volunteers are imperative for finding and informing on HABs. If you would like to learn more about becoming a volunteer, or would like to become a member, please visit their website [here](#).
